Ivan Sazontov

has successfully completed the online Specialization

Modern Web Development with TypeScript

In this Specialization, learners developed the skills to design and build modern web applications using TypeScript across the full stack. They gained a foundation in TypeScript's compiler and type system, advanced their expertise with object-oriented programming, and applied type safety to real-world frontend and backend projects. Learners practiced building scalable React applications, secure Node.js APIs, and database integrations with MongoDB, ensuring cleaner, more reliable, and production-ready code.
